|---------------------|-------------------------|
| Site Name           | Hundal Farms 61C        |
| Report Date         | 12/19/2022              |
| Covered Period      | 10/01/2022 - 12/31/2022 |
| System Size (kW DC) | 100.0                   |

# QUARTERLY PRODUCTION REPORT - Q4/2022

## Performance Reporting

| Monthly kWh Production |                            |                         |                  |                |
|------------------------|----------------------------|-------------------------|------------------|----------------|
|                        | Estimated Generation (kWh) | Actual Generation (kWh) | Difference (kWh) | Difference (%) |
| Oct-2022               | 28,064                     | 15,848                  | -12,216          | -43.5          |
| Nov-2022               | 20,693                     | 13,748                  | -6,945           | -33.6          |
| Dec-2022               | 14,648                     | 4,881                   | -9,767           | -66.7          |

|       |        |        |         |       |
|-------|--------|--------|---------|-------|
| Total | 63,405 | 34,477 | -28,928 | -45.6 |
|-------|--------|--------|---------|-------|

| Cumulative kWh Production |                            |                         |                  |                |
|---------------------------|----------------------------|-------------------------|------------------|----------------|
|                           | Estimated Generation (kWh) | Actual Generation (kWh) | Difference (kWh) | Difference (%) |
| Oct-2022                  | 28,064                     | 15,848                  | -12,216          | -43.5          |
| Nov-2022                  | 48,756                     | 29,596                  | -19,160          | -39.3          |
| Dec-2022                  | 63,405                     | 34,477                  | -28,928          | -45.6          |
